

# CompTIA Certification Training Programs

## A+ Certification

A+ certification validates the latest skills needed by today's computer support professionals. It is an international, vendor-neutral certification recognized by major hardware and software vendors, distributors and resellers. A+ confirms a technician's ability to perform tasks such as installation, configuration, diagnosing, preventive maintenance and basic networking. The exams also cover domains such as security, safety and environmental issues and communication and professionalism.

A+ ensures the right people have the right skills. While many of the essential skills are universal, there are additional skills required to support the needs of businesses. By offering certification options for specific job scenarios, A+ gives individuals the ability to grow their careers in a certain area, and employers the flexibility to choose the exam combination that best fits their needs.

Program Length/Cost: 40 Hours/\$1,650

## Network+ Certification

Network+ validates the knowledge and skills of networking professionals. It is an international, vendor-neutral certification that recognizes a technician's ability to describe the features and functions of networking components and to install, configure and troubleshoot basic networking hardware, protocols and services. Although not a prerequisite, it is recommended that Network+ candidates have at least nine months of experience in network support or administration or adequate academic training, along with a A+ certification.

The demand for skilled network support professionals continues to grow, and Network+ is a valuable credential to help start or enhance a networking career. In fact, many IT certifications integrate Network+ into their curriculums. Microsoft added Network+ into their Microsoft Certified Systems Administrator (MCSA) program, and other corporations such as Novell, Cisco, HP, Lotus and 3Com also recognize Network+ as part of their certification tracks.

Program Length/Cost: 40 Hours/\$1,650

### Key benefits for becoming certified:

#### **A solid credential that makes you more marketable, leading to better job opportunities.**

Top technology companies including CompuCom and IBM have made A+/Network+ certification mandatory for their service technicians. Additionally, more than 100 companies now require A+/Network+ certification as a prerequisite to qualify for their corporate and vendor-specific training programs.

#### **Credibility and respect in the workplace.**

Nearly 71 percent of certified professionals say that credentials give them more prestige among their colleagues.

#### **Validation of achievement in an industry-valued skill.**

A+/Network+ is an opportunity for individuals to earn the credential that proves their competency in core hardware and operating system technologies including installation, configuration, diagnosing, preventive maintenance and basic networking.

#### **Increased knowledge, leading to increased job satisfaction.**

Ninety-three percent of A+/Network+ certified IT professionals feel their customers are in qualified hands, and 84 percent say they have the confidence and required skills to do a superior job.

#### **Viable career path, leading to higher level positions.**

Seventy-four percent of IT managers say a A+/Network+ certification is an important factor in considering an employee for a promotion.

Our IT Certification Programs are designed to prepare students for Microsoft and CompTIA certification exams. We provide Hands-on labs for students in order to have them fully understood and experienced of what they learn about.
